Overview Of The Maricopa County Air Quality Department's Rule 345 Rulemaking: This supplemental rule revision is intended to update and clarify rule requirements for commercial vehicle coating operations that emit volatile organic compounds (VOC). The proposed changes contained in this supplement will allow for current and future technology amendments, use of localized terminology, clarification of standards and work practices and deleting obsolete rule requirements. These changes are a result of national and local stakeholder input from five workshops conducted by Maricopa County Air Quality Department beginning in 2013.

Thank you for participating in the rulemaking process.
